DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25, 46-70, and 88-92, drawn to determining availability of a wireless service, classified in class 455, subclass 405.
 - II. Claims 26-32, 42-45, 71-74, and 84-87, drawn to purchasing a wireless service, classified in class 455, subclass 407.
 - III. Claims 33-41 and 75-83, drawn to choosing a specific wireless service for a customer, classified in class 455, subclass 406.
2. Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not state specific functions of the wireless service as the subcombination does. The subcombinations have separate utility such as choosing a particular wireless service and purchasing said wireless service.

Art Unit: 2683

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to the secretary of Terry Stalford on 7/31/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
